

COVID-19 Checklist

Supply Chain Operations

As leaders in the supply chain and inventory management industry, the Clear Spider team has put together a quick checklist on how to best manage supply chain operations during COVID-19.

- 1 Maximize Employee Safety**
Provide the appropriate equipment and implement the right protocols in place to keep your team healthy and safe.
- 2 Create COVID Task Force**
Maximize efficiency and rethink how things are done from procurement to operations, warehousing and production.
- 3 Facilitate**
Look for opportunities to donate your surplus in stock and benefit your community.
- 4 Improve Operating Procedures**
Adapt to current circumstances by modifying your preparation, production and delivery procedures.
- 5 Switch Production Capabilities**
Explore options to shift your company's manufacturing processes while accounting for production factors and variables across your organization.
- 6 Work with Partners**
Strengthen your supply chain by taking advantage of opportunities to work with other organizations.

After the Clear Spider [webinar](#), you will receive a full action plan document detailing how to accomplish all of the tasks on this checklist.
